Taking advantage of the weak mar-
ket, the bears made an attack on the
stronger issues on the New York ex-
change on Saturday. Support being
lacking, the market went down sharply
in all quarters with the specialties
most affected. Weakness of Steel had
a dispiriting effect on the general mar-
ket and foreign selling of Canadian
Pacific was a factor in depression of
the railroad list.

It is estimated by the statisticians
of commerce in Washington that the
sugar consumption of the United
States the coming year will be larger
than ever before and will amount to
about eighty-seven pounds per capita,
against eighty pounds per capita in
1910 and thirty-nine and a half pounds
in 1880. More than eight billion pounds
of sugar were consumed in the United
States this year, costing approximately
400 million dollars. Hawaii furnished
approximately forty-seven million dol-
lars' worth.

Reorganization of the Kona Tobacco
Company is under way, including an
increase of the capital stock from one
million to two million dollars. W. D.

Some Growing Children
are under size—under weight.

Some grow tall and thin, others are backward in studies—pale and frail—improper assimilation is usually the cause.

If your children are not rugged and ruddy and rosy—bubbling with energy and vim at all times—

you owe them SCOTT'S EMULSION—nature's concentrated nourishment to build body, bone, muscle and brain.

CHILDREN NEED SCOTT'S EMULSION TO PROGRESS.

Scott & Borden, Stamford, N. J. 12-10

Schrader has succeeded J. L. Davies as manager and better buildings than those recently burned are being erected. Mr. Schrader, who was lately manager of the Hawaiian Tobacco Company, has begun the clearing of thirty acres of land, which will increase the planted area to thirty acres this year, and the crop will be more than doubled. The company raises a superior quality of tobacco, which brings high prices in New York.

Who Will Be the Lucky 1000?

This month we will produce one thousand HUDSON cars. That is a small percentage of the number of people who will want them, for before a single HUDSON was offered, more than one thousand individuals had paid their deposit to assure getting cars.

The demand in excess of the number we can build has been in about that ratio ever since the first photographs were shown.

Electric Self-Cranking—Electrically Lighted

WHY THIS GREAT DEMAND
People recognize now the importance of engineering brains in their relation to mechanical perfection. Without knowledge a smooth, simple, safe, satisfactory car is impossible.

These cars were designed by 48 skilled engineers gathered from Europe and America representing 97 factories. They had a hand in building over 200,000 automobiles. These men represent about all that has been learned in motor car design. Some have made the greatest headway of all in designing six-cylinder cars. Some are specialists in other lines. So the combined skill and knowledge of all these men is focused upon the perfection of HUDSON cars.

All who are motor-wise recognize the importance of having a car built to under such favorable conditions. That regardless of price. It sells at \$2450, is why, with the maximum of 1,000 completely finished and equipped as cars for delivery this month, only one above. Prices are f. o. b. Detroit.

The HUDSON "37" is their four-cylinder masterpiece. It sells at \$1875, completely equipped with electric self-cranking device and electric lights, speedometer, clock, top, windshield and 12-inch upholstery. There is nothing more to buy.

The "54" HUDSON—a Six, capable of doing 65 miles an hour and a speed of 58 miles in 30 seconds from standing start, is offered as a car superior to any automobile on the market under such favorable conditions. It sells at \$2450, is why, with the maximum of 1,000 completely finished and equipped as cars for delivery this month, only one above. Prices are f. o. b. Detroit.
